

## 异型曲面快速成形机

Rapid prototyping machine shaped surfaces

### 主要用途/main usage:

本机是较理想的板料成形设备，改变了传统的钣金成形手工操作，降低了操作者的劳动强度，提高生产效率，广泛应用于飞机、火车、汽车、造船、电器及轻工等行业。解决了通用模具替代专用模具这一难题。

This machine changes the traditional style of sheet-forming by manually. Reduce labour intensity and increase the productivity. It is widely used to making plane, train, automobile, ship, electronic, light industry and etc. It solved the technology that general dies are substituted for special dies.

压缩/Shrinking

锤平/Planishing

校平/Flattening

压延/Stretching

球面成型/Doming
